# BOVIE – THE INVENTOR OF ELECTROSURGERY

The first use of the Bovie® electrosurgical generator in an operating room was on October 1, 1926, at Peter Bent Brigham Hospital in Boston, Massachusetts. A few days earlier (September 28, 1926) Dr. Cushing had been unsuccessful in removing a mass from a patient's head due to its highly vascular nature. In Dr. Cushing's notes from October 1st, "...with Dr. Bovie's help I proceeded to take off most satisfactorily the remaining portion of tumor with practically none of the bleeding which was occasioned in the preceding operation."

Over seventy-five years later, we continue to improve the work of Dr. Bovie. The following pages represent our product line, including four Bovie® electrosurgical generators and three high frequency desiccators. The work continues today, but our sincere thanks go out to Dr. Cushing and William T. Bovie for their incredible invention.

## DERM 101/102 HIGH FREQUENCY DESICCATOR

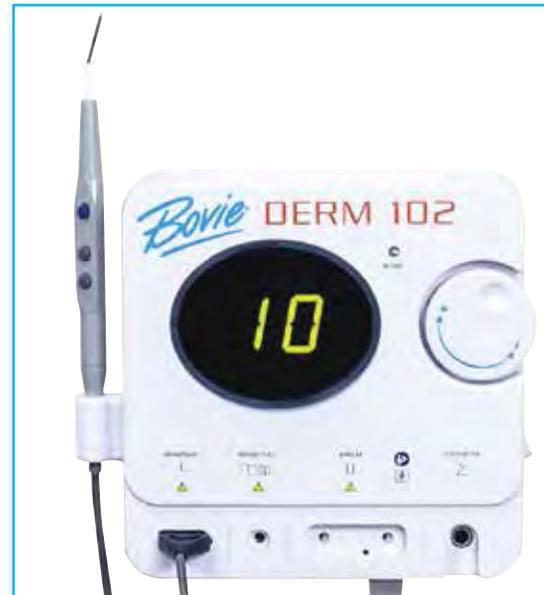

The Derm 101 and Derm 102 are economical, 10 watt high frequency desiccators, thoughtfully designed to give practitioners the ability to perform in-office, minor skin procedures such as the removal of skin tags, benign lesions and premalignant lesions. The Derm 101 High Frequency Desiccator offers ten watts of monopolar power, adjustable in 1/10th watt increments, to desiccate and fulgurate tissue. The power can be adjusted using the 3-Button Power Control Handpiece (A902) or using the rotary dial on the unit. The unit features a large, bright, LED display for excellent visibility across the procedure room. For the practitioner utilizing bipolar electrosurgery, Bovie offers the Derm 102 High Frequency Desiccator with 10 watts of bipolar power, adjustable in 1/10th watt increments.

## AARON® 940 HIGH FREQUENCY DESICCATOR

The Aaron 940 forty watt High Frequency Desiccator allows your physician to change power in ONE STEP; using the rotary dial feature directly on the unit or using the convenient up/down buttons on the autoclavable handpiece. If footswitch activation is needed, simply plug in the footswitch and activate. No additional handpiece is required. The Aaron 940 adjusts in 1/10th watt increments in the first 10 watts for the most accurate energy delivery in both monopolar and bipolar low watt procedures.

## AARON® 950 HIGH FREQUENCY ELECTROSURGICAL GENERATOR/DESICCATOR

The Aaron 950 is the first High Frequency Desiccator with Cut and known as the TWO-in-ONE unit. One side of the unit allows physicians to perform simple desiccation procedures without a costly grounding pad, while the other side provides 60 watts of Cut for increased surgical capabilities. Equipped with six doctor presets, the Aaron 950 provides flexibility and versatility to most physician practices.

## AARON® 950-G OB/GYN TOTAL SYSTEM SOLUTION

The A950-G combines the Aaron 950 package with the smoke evacuation system and a complete mobile stand to produce a compact, mobile system for the office. As an added benefit, the A950-G includes a loop electrode kit (5 of our most popular loops), 5 extended ball electrodes and a smoke evacuator hose reducer fitting for attaching to a vaginal speculum.

Style # A950-G / A950-220-G

### Standard Equipment

- **A950 electro-surgical generator**
  - + Five extra disposable electrodes
  - + 50 sharp and 50 blunt single-use dermal tips
  - + A901 reusable single 3-button pencil
  - + A910 ten handpiece sheaths
  - + A1202C reusable grounding cord
  - + A1202 five solid grounding pads
- **SEGYN Smoke Shark system**
  - + SE02 Smoke Shark with pneumatic footswitch
  - + SF35 35-hour filter
  - + 786T 7/8" (22.23mm) tube 6' (182.9cm) long
  - + SERF reducer fitting (attaches to vaginal speculum)
- **A812-C electro-surgical mobile stand**
  - + A812 mobile stand
  - + A812-E height extender
  - + A808-T instrument tray
  - + A812-BT bottom tray

**ELECTROSURGERY PENCILS**

The standard Bovie pencils feature button, rocker, or foot control activation, available with and without holster and/or scratch pad. All disposable pencils are packaged individually and are sterile. Additionally, Bovie offers a reusable pencil (ESPR2). This pencil is validated to forty (50) autoclave cycles and is available sterile or non-sterile.

## SUCTION COAGULATORS

Suction coagulators allow fluid evacuation with or without simultaneous coagulation. Suction Coagulators are compatible with Bovie® generators, as well as, those of most other companies. The devices feature three different diameters, 6" flexible shaft and hand or foot activation. The single use devices are individually packaged sterile, ten per box.

## DISPOSABLE ELECTRODES

All disposable electrodes utilize the standard 3/32" (2.3mm) stainless steel shaft. The molded electrodes feature safety grip insulators combining patient and user safety with easy insertion into and removal from the surgical pencil. Disposable electrodes are manufactured to the highest standards. They come individually packaged sterile\*.

## RESISTICK II™ COATED ELECTRODES

Resistick II™ coated blade, ball and needle electrodes are expertly coated with PTFE (polytetrafluoroethylene). Resisting eschar build-up the electrode moves more effectively through tissue increasing efficiency during surgical procedures. Simply use a damp sponge or cloth to almost effortlessly clean the debris off the Resistick II™ electrodes.

## HIGH-TEMPERATURE CAUTERIES

Bovie Medical has been the number one manufacturing the battery operated cauteries for decades. The new, safety-enhanced, snap-design cautery is the only battery-operated cautery in the world to address known safety hazards of improper disposal! The improved patent-pending cautery offers a new safety-enhanced design with a recessed button to reduce the potential for inadvertent activation. Bovie also modified the cautery units to allow the practitioner to “snapped off” the end of the cautery for safe and effective removal of the battery power source.

## LOW-TEMPERATURE CAUTERIES

Bovie Medical has been the number one manufacturing the battery operated cauteries for decades. The new, safety-enhanced, snap-design cautery has been enhanced based on valuable customer feedback. The improved cautery offers a new safety-enhanced design with a recessed button to reduce the potential for inadvertent activation. Bovie also modified the cautery units to allow the practitioner to “snapped off” the end of the cautery for safe and effective removal of the battery power source. 10 per box.
